Education

•Bachelor of Technology in Computer Science and Engineering (Honors) *2023-27*
K L Deemed to be University, Vijayawada CGPA: **9.24**

•Intermediate *2021-23*
Sri srinivasa graviity junior college vijayawada Percentage: **89.4**

•Secondary School *2020-21*
Slate the School Vijayawada CGPA: **99.16**

Personal Projects

•Website Uptime & Latency Monitoring System | Google Cloud Platform (GCP))

Developed a cloud-based website monitoring system to track uptime, latency, and real-time service availability

- Architected a GCP-based monitoring system tracking uptime and latency across 10+ endpoints, achieving 99.9and reducing false-positive alerts by 40
- Configured automated health-check pipelines via Google Cloud Monitoring, cutting mean time-to-detect (MTTD) outages by 60saving 10 hours/month in manual troubleshooting.
- Optimized system reliability through automated logging, performance monitoring, and cloud-native infrastructure.

•Serverless Contact Form & Enquiry Management System | AWS Lambda, API Gateway, DynamoDB

Built a serverless enquiry management application using AWS Lambda, API Gateway, and DynamoDB for scalable request handling.

- Optimized the performance of backend systems through seamless API connections; achieved a reduction in average response times from three seconds to just one second during peak usage hours.
- Leveraged Cloud Compute Engine and Cloud Functions for event-driven fault detection, processing 500+ health checks per hour with zero manual intervention.

•Employee Training & Onboarding Management System | HTML,CSS, Node.js, MySQL, Git,GitHub

Developed a full-stack employee onboarding and training management platform using the MERN stack. .

- Implemented secure authentication, role-based access control, course management
- Designed responsive user interfaces with reusable React components to enhance user experience and accessibility.
- Integrated REST APIs and MongoDB database operations for efficient data management.

Experience

•Azure Cloud Engineer (Intern) | Capgemini *June 2026 – December 2026*

- Worked with Microsoft Azure services including Azure Functions, Automation Accounts, Storage Accounts, Azure Monitor, and Log Analytics to develop and manage cloud-based solutions.
- Assisted in monitoring cloud resources, analyzing performance metrics, and troubleshooting infrastructure issues using Azure monitoring tools.
- Participated in cloud infrastructure management, resource provisioning, and deployment activities using the Azure Portal and command-line tools.

Technical Skills and Interests

Languages: C, Python
Web Dev Tools: Node.js, VS Code, GitHub
Cloud/Databases: AWS, GCP, MongoDB, MySQL
Soft Skills: Problem Solving, Self-learning, Presentation, Adaptability

CERTIFICATIONS

- AWS Certified Developer–Associate
- MongoDB Associate Database Administrator
- Microsoft Certified: Azure Fundamentals
- Certified Advanced Automation Professional
